The Best Brakes in the World
Racing and competition drivers know the vital

## BALANCING

For the finest Electronic Balancing Service do as the World Champions did for their Crankshafts in 195919601963196519661967

For equal compression, polished combustion chambers and ports, with matched manifolds

COME TO

53, Gt. Suffolk St. London, S.E. 1 WATerloo 6141

## SERCK keep hot cars cool..

## Oll COOLERS

A Serck oil cooler kit is essential for keeping lubrication systems cool in competition or on long high-speed runs. The kits which are tailored to fit individual models, consist of a lightweight, brazedaluminium cooler unit, piping unions, mounting brackets and, where necessary, a sand wich block or adaptor to fit the oil filter. Recommended retail prices begin at $£ 9.15 .0$ Available from your garage or any Serck Services branch (See telephone directory for address)

## RADIATORS

Practically every manufac turer of F.1, F.2, F.3, G.T. Prototype and Sports Racing Cars fits Serck Radiators. The few who don't can find out what they are missing by contacting Serck S.M.S. Company, Coronation Road, London N.W. 10 Telephone: 01-965 5442

## SEREK SERVICES

Head Office: 456 Stratford Rd., Birmingham 11

Organised by the
British Racing Drivers' Club
In association with the
Daily Express
7

Whether you prefer 2, 3 or 4 wheels
Ferodo brake linings are race and rally proved for your safety

It's $\mathbf{1 , 2 , 3}$ for Goodyear in Its 1, Race of Champions! 1968 Ra's continuing supremacy

Goodyear's again in the very first Big One of 1968, with Goodyear tyres. $\underset{\text { Big drivers all on }}{\text { Bree }}$

Last year, drivers on Goodyear tyres scooped the world.

Goodyear firsts included: the World Grand Prix Championship (for the second successive year); the Indianapolis 500 ; Le Mans 24 -Hour Race (for the third consecutive year); the Monaco, French, German, Belgian and Canadian Grands Prix; the gruelling Shell 4000 Rally.

The know-how that wins the Big Ones is the know-how behind Goodyear tyres for everyday motoring. Know-how that produced the Polyester G8 cross-ply tyre and the Goodyear G8oo, today's most advanced radial.

Corner safer, stop faster and get thousands more miles-with Goodyear tyres.

## Foreword

The Hon. Gerald Lascelles

President of the British Racing Driver's Club

TODAY the world of Motor Sport still mourns for Jim Clark, who was a familiar figure at Silverstone, and the winner of the 1967 R.A.C. Grand Prix at the Circuit. To everyone who saw him drive, he was an impeccable master of his art, and one of the great racing drivers of all time. Today he would have received the B.R.D.C. Gold Star, awarded to him for surpassing J. M. Fangio's record of 24 Grand Prix victories-Jim's 25th was in South Africa on New Year's Day. To those of us who knew him personally, he was a true sportsman, his head unturned by success, his humour and determination never diminished by failure.
During the afternoon, before the start of the Daily Express Trophy Race, we shall pause for a minute to remember this remarkable Scotsman, Jim Clark, O.B.E., World Champion driver twice over, and first British winner of the Indianapolis 500 .
1968 marks the third year of the current Formula 1, the cars which you will see contesting the big race today. Already there is evidence of improved reliability and safety in harnessing more than 400 horsepower to the road, an achievement of design and development which the sceptics claimed as impossible when the Formula was announced. Now is the time, with eight works teams actively involved in the Championship series, and a ninth about to make its first appearance, for the International Sporting Commission to decide that this Formula should be extended beyond the five-year period originally prescribed.
The strength and viability of the three-litre Formula is confirmed by the existence of no less than eight different engine designs, each of which is still far short of its ultimate power potential. Development programmes are planned far in advance, and designers are not willing to commit themselves to work on a project which can be cut short by the abrupt termination of any Formula laid down by the governing body.
My warmest thanks on behalf of the Club go to Sir Max Aitken and the Daily Express, without whose loyal support Silverstone might not have become the established home of British Motor Racing, and to all our helpers round the circuit.

I wish you all a good day's racing.

April 27th, 1968.
President
Brillsh Racing Driver's Club.

## Officials of the Meeting

This Meeting is held under the International Sporting Code of the Federation Interand Supplementary Regulations issued by the British Racing Drivers' Club.

STEWARDS: John Gott, M.B.E., G.M.(R.A.C.), T. Blackburn, Esq., The Hon. Gerald Lascelles, J. A. Ellison, Esq., D. J. Scannell, O.B.E.

JUDGES: R. L. Clarke, Esq., W. E. Daniel, Esq., J. H. Kemsley, Esq., P. Fortheringham-Parker, Esq., W. M. Couper, Esq.

OBSERVERS: Chief Observers: M. H. Morris Goodall and E. H. G. Browning. Observers: A. Daunt Bateman, D. N. Brown, A. Dart, G. Dunham, J. B. Emmott, A. J. Holberton, J. W. S. Holgate, R. M. Helland, D. J. G Lamden, J. Marshall, B. G. P. de Mattos, I. Patterson, Lord Rosehill, J. W Rowley, G. H. Symonds, E. Thompson, D. Truman, M. H. Wilby, C. D. V Wilson. Assistant Observers: J. P. Ashton, L. S. Deal, B. W. Ferris, R. Gibson Jarvie, R. J. Hodson, E. J. Pennock, P. W. Samengo-Turner, P. J. Sargent, C. T. Snowdon, S. Tett.

FLAG MARSHALS: Chief Flag Marshals and Starters: K. D. Evans and W. Ruck-Keene. Flag Marshals : J. D. Bannister, G. F. Bond, Sqdn. Ldr. E. A Brittain, A.F.C.(Rtd), P. J. Christensen, V. M. Christensen, J. Clark, W. N Clarke, R. G. Eaton, S. A. Ekins, B. E. Fox, W. O. Gascoigne, G. E. Haddon Richards, K. G. Sharpe, W. G. Standing, H. W. Startin, I. E. Tucker, J. Uren, P. G. Vale.

PIT MARSHALS: Chief Pit Marshal: P. C. T. Clark. Asst. Chief Pit Marshals: G. Connelly and P. Corrie. Pit Marshals: K. E. C. Barton, I Betteridge, E. W. Bunce, J. E. Clowes, P. K. Dawe, W. Gibbs, J. N. K. Hay, J. S Hitchins, A. N. Hunt, T. Ireland, E. A. Mortimore, P. R. Muncaster, C. OsborneDoor, L. J. Roy Taylor, P. Waumsley, Clerks: Mrs. I. BetterIdge, Mrs. P. C. T Clark.

PADDOCK MARSHALS: Chief Paddock Marshal: M. J. M. Bosley Asst. Chief Paddock Marshals: Flt. Lt. A. B. Galuska, A. Hargreaves Paddock Marshals: F, H. Barnes, G. F. Bond, D. R. Broadhurst, H. W Brockbank, I. M. Curtis, W. K. Dalby, K. Danielli, H. Dix, H. M. Driver, B. B Duthie, T. Entwistle, L. J. Foxley, P. D. Friend, J. Friend, K. Gibson, P. J Hindle, V. Howkins, F. Keevill, P. B. Kingston, G. A. S. Knox-Gore, W. A. S Knox-Gore, T. R. Miller, L. A. Monaghan, P. T. Morom, R. J. O'Shea, D. J Payne, K. F. Roberts, R. Robinson, N. W. Rogers, B. W. Walker, K. Wilson L. B. Wooster, J. W. Wooton, B. Wright.

PIT AREA MARSHALS: Chief Pit Area Marshal: L. Barrington Upton. Pit Area Marshals: F. Ashley, C. Aston, A. K. Cooper, P. K. Cooper, A. M. Gayes, R. D. Grace, Miss R. M. Green, F. J. Perrott, J. S. Perry, W. H. Perrott G. Richards, C. A. Rodgers, J. N. Sumner.

TIMEKEEPERS: C. Audrey (in charge), F. A. Lane, E. A. Colman, A. S. Barritt. Assisted by: Mirs. D. Audrey, Miss P. Burt, Miss. P. Wallis.

MEDICAL AND FIRST AID ARRANGEMENTS: Chief Medical Officer: Mr. F. J. C. Mathews, F.R.C.S. Deputy Chief Medical Officer: Dr. P. H Smith. Consultant: Mr. J. H. C. Phillips, F.R.C.S. Medical Liaison Officer : Dr. W. Carton Winterbottom. Doctors: Dr. N. H. Barley, Dr. C.J. Buckingham Dr. G. F. Cockings, Dr. M. H. Daniels, Dr. C. E. Friskney, Dr. G. R. C. D Gibson, Dr. P. Griffiths, Dr. F. S. Harlow, Dr. A. M. Lindsay, Dr. D. Lindsay, Dr. T. Fife Morris, Dr. D. J. F. Munro, Dr. J. D. Nelms, Dr. K. W. Oldham, Dr H. P. Phillips, Dr. K. M. Saunders, Dr. T. J. Scannell, Dr. T. A. Williamson Members of St. Mary's Hospital (Paddington) Motor Club.

COURSE MARSHALS: Chief Course Marshal: Arthur Tooth. Asst Chief Course Marshals: K. N. Crowe, N. P. Crowe, R. H. Davies. Course Marshals: Members of the following Clubs: Aston Martin Owners' Club Bentley Drivers' Club, British Motor Racing Marshals' Club, The M.G. Car Club, Midlands Motoring Enthusiasts' Club, Northampton and District Car Club, North Staffs Motor Club, Nottingham Sports Car Club, Peterioorough Motor Club, 750 Motor Club, Vintage Sports Car Club.

SCRUTINEERS : Chief Scrutineer: Major L. F. H. Woolston. Scrutineers : F. Harrison, P. F. Jowitt, FIt. Lt. G. T. Roussel, Dr. G. A. Meek, G. W. G. Ward Eligibility Scrutineers: C. A. A. D. Mitcheli, S. R. Proctor, E. A. Wandsworth. Clerks: Wg. Cdr. \& Mrs. J. R. Trotman, B. Gilbert-Smith, Major W. J Port, R.E. Scrutineers' Marshals: N. Didwell, A. W. Lawson and Members of the Bugatti Owners' Club

LIAISON MARSHALS : Members of the Metropolitan Police Motor Driving School Club.

SCOREBOARDS: Members of the Bentley Drivers' Club and Assistants. RACE CONTROLLER: R. C. A. Smith.

RACE CONTROL: Miss F. Boddy, Mrs. K. Cooke, Mrs. B. Facer, Miss J. I. Osborne-Door, Miss R. A. Pringle, Miss C. Sadler, Mrs. C. J. Snowdon, Mrs W. Carton Winterbottom, Mrs. E. C. Zettl. Messrs. D. E. Buck, B. R. Darlow, M. Stuart, L. George.

AIRFIELD CONTROL: Col. C. Barker and Members of B.M.R.M.C. FIt/Lt G. W. Capel and Nembers of 1563 (Bucks) Sqdn. A.T.C.

PUBLIC RELATIONS: Tim Odhams, Roger Palmer.
PRESS SECRETARY: G. H. Macbeth.
RACE ORGANIZING COMMITTEE: C. Audrey, K. D. Evans, F. R. Gerard. FIRE PROTECTION: Divisional Officer Davy and Units of Northamptonshire Fire Brigade. Marshals of the British Motor Racing Marshals' Club
COMMENTATORS: Peter Scott-Russell, K. H. Douglas, J. Tilling, L. Leston, N. Hay.

TRACK MANAGER: J. W. Brown. Deputy: J. P. A. Wade. DEPUTY CLERK OF THE COURSE: G. R. Hall.
CLERK OF THE COURSE: J. G. S. Sears.
SECRETARY OF THE MEETING: Anthony Salmon.

All trophies to be won outright

# 20th International <br> Daily Express Trophy 

by BASIL CARDEW

of the "Daily Express"

Silverstone-the very name has a romantic ring to the afficionados of motor racing-is Britain's greatest festival of speed. Today's meeting is no exception with a complete cross-section of motor racing and events for cars as diversified as Formula One, saloon cars and historic racing cars.

This combination of all-round racing activities plus the great expertise of the British Racing Drivers' Club and the backing of the Daily Express has made the traditional International Trophy meeting not only the first important event of the season but also the Mecca of all racing fans.
This year we celebrate the 20th year of the association between the B.R.D.C. and the Daily Express.

It is no coincidence that during those 20 years British cars and British drivers have grown to a position of dominance in the international motoring scene. Whether in Europe, America, Africa or Australasia our racing men and machines now enjoy universal admiration.

How different was the situation just after the last war, when the B.R.D.C. and Tom Blackburn, chairman of Beaverbrook Newspapers, sat down to plan a motor racing festival at the war-time bomber base at Silverstone near Towcester.

Since that date all the great names of motor racing have battled for victory honours over the high speed $4 \cdot 71$ kilometre circuit.

Guiseppi Farina-the very first world champion driverJuan Fangio, Alberto Ascari, Mike Hawthorn, Graham Hill and Jim Clark all have their names inscribed on the Silverstone Hall of Fame.
Today's meeting is no exception as a breeding ground for future champions. Many of the youngsters competing in the Formula Three event hope for world honours and look forward to inheriting the proud mantle that has been worn by men like Stirling Moss, Peter Collins and Tony Brooks.

Personally I tip three youngsters for the future. Mike Walker, the 22-year-old leader of the Chequered FlagScalextric racing team and his 19 -year-old team-mate lan Ashley, have both gone through the mill of the Formula Three European circuit and despite their youth are this year enjoying a "sponsored" drive.

The third man is Peter Westbury, who drives a Brabham for the Ian Walker Team Celebrity.

All three will be contesting the Formula Three event at Silverstone today.

In the main International Trophy Race two young men stand out as great hopes for the future. Both have already made their mark in the sport in Formula Two and other types of racing, but 1968 promises to be the year which will put both their names on the map in capital letters.

First there is Piers Courage-son of the head of the Courage Brewery complex, and married to the late Earl Howe's beautiful daughter Sally.

Over the last few years Piers has campaigned with considerable success in Formula Three and latterly Formula Two. But a reputation for being "hairy" seemed likely to prevent him from finally reaching the top echelon in the Grand Prix field.

But the winter season in the Tasman Series very soon changed the minds of the men who are responsible for sponsoring and managing Formula One teams.

Driving a Formula Two McLaren car, borrowed from John Coombes, the young Courage showed that he was the equal of the best of the current crop of drivers by finishing third in the series behind the late Jim Clark and Chris Amon, who now drives for Ferrari.

His most dramatic exploit "down under" was his win at Longford in Tasmania in apalling conditions, with pouring rain and a flooded track.

I need hardly remind you that the Tasman Formula allows cars of $2 \cdot 7$ litres- 1100 c.c.s more than the Courage machine.
The second new star must be Jackie Ickx, driving the lone Ferrari in today's race. Ickx is the son of a famous Belgian motoring journalist. At 16 he was motor cycle champion of Belgium, and at 18 he was driving saloon cars with Sir John Whitmore for the Alan Mann racing team. Sheer talent, great skill and outstanding courage have rocketed him into the prestigious Ferrari team. He is a man to watch today.

Doing battle with the new stars will be most of the great Prix circus.
The fantastic Jack Brabham-the old man-who has three times won the World Championship, the only man to do so in a car of his own manufacture.

> Black bonnet and grille, power/disc brakes, rev counter and an electric clock don't make Viva G. T. go faster. But something sure does.

A 2-litre, ohc, twin carb<br>112 bhp engine with four<br>bright exhaust pipes does<br>the trick. Viva Gran Turismo. All-black luxury inside.<br>Ammeter, $120-\mathrm{mph}$ speedometer.<br>Oil pressure and temperature gauges. Twin bonnet air scoops.<br>Beefy gearbox with a short<br>snappy shift. Coil suspension<br>right round. The Vauxhall Breed's got style.<br>Viva Gran Turismo.<br>$£ 1063$ purchase tax paid.

Denny Hulme, the current World Champion and former Brabham protégé, now driving for the Bruce McLaren motor racing team. A tough-looking, straight-talking, genius behind the wheel, Hulme is a man who can always pull out that little bit extra needed to win the big race.
In the B.R.M. team, now led by Mike Spence and partnered by Pedro (Mexican Pete) Rodriguez, we have the potential one, two winning combination. The 1968 car is a completely redesigned vehicle with a chassis by Len Terry-of Lotus and Indianapolis fame-with the very promising B.R.M. V-12 motor.
Then there is the young Austrian Jochen Rindt, one of the greatest motor racing talents to emerge in the last five years. Already in Formula Two he has shown himself to be almost invincible and now, backed by the great Brabham Organization he must be considered as a potential World Champion.
Bruce McLaren, who has always been close to but never quite made the top award in motor racing must, too, now be considered in the same light. His win in the Race of Champions earlier this year has given him a new confidence in Formula One previously only discernible in his successful forays against the Americans in the Can-Am Series.
Finally there is "Grandad".
Graham Hill, who at 38 has graced the motor racing scene in his own unique and heartwarming manner. Few people in life can display such personality allied with such determination and courage.
At Silverstone Graham has always been a force to be reckoned with, and some of his greatest and most exciting victories have taken place in this circuit.
All in all today promises to be an enthralling and entertaining experience.

I hope you all enjoy it.

## INNES IRELAND

Sports Editor-AUTOCAR

The Spring Meeting at Silverstone, organized by the B.R.D.C., is one of the dates in the International Calendar which has become a tradition; one thinks of it in the same way that one does the Monaco Grand Prix. Although it is no longer the first meeting for Formula 1 cars in the European season, its timing seems to fall more in line with the appearance of new cars. Today, we can expect to see a comprehensive entry of the latest cars which will compete for top honours in the World Championship events during 1968.
Today, looking forward to the race, I find more excitement in the cars than there has been for many years, and the British Racing Drivers Club have done wonders in their entries for the Daily Express International Trophy Race. There are so many new cars, several of them using the same Ford V-8 engine which suddenly sprang into prominence last season when Jim Clark won the Dutch Grand Prix in the new Lotus on its first outing.
The Repco-Brabham entries for Brabham and Rindt should be full of interest, for the engine is a new, and more powerful unit which has just arrived from Australia. Rindt is appearing in this team for the first time, and his fiery driving should be worth watching in this very competitive car.
B.R.M. were the team who produced the greatest surprise, and a very pleasant one, at the Race of Champions in March. The cars running today are the Len Terry-designed chassis which were used in the recent Tasman series and have the V -12 engines. The cars seem to be much more manageable than the $\mathrm{H}-16 \mathrm{~s}$, with both Spence and Rodriguez proving the point at Brands Hatch.
Another team using the V-12 B.R.M. engine are Cooper. So far the car hasn't produced any fireworks, which is not surprising when one considers that it has been using the same old slave engine which has done all the testing and development. With the new engine the car should be capable of matching the performance of the works B.R.M.s. Frank Gardner will be driving the lone entry.

We can expect to see the first appearance of the new Eagle Mk 1 A with its $V$-12 engine in the capable hands of the American driver-constructor, Dan Gurney. The team have had a major re-organization during the winter, and they are now making their own engines. Recent bench tests have revealed that this engine is producing 441 b.h.p. Gurney is one of the best drivers of the moment, and his car is certainly due for further success.
I am a little disappointed to find but one entry from the prancing horse stable-Ferrari-but one is better than none! The car that Ickx is driving is not the latest chassis, but the engine is, being the four valve per cyclinder unit. Ickx is a newcomer to Formula 1, but is full of promise.
Lotus need no introduction to the Silverstone spectators, although the colours of the team are perhaps unfamiliar. The recent tragic accident in which Jim Clark lost his life has reduced the entry from the team to one car, but one may be sure that Graham Hill will fly the team colours proudly and well. His car is much the same as last season, with detail design improvements. Reliability has improved considerably, and surely Hill must be a popular favourite.
But it is to the McLaren cars, in their bright orange colours, that I would look for the chaps most likely to upset the applecart. The cars are immaculately prepared and built, and they are using the same Ford V-8 engines as Team Lotus. McLaren has done a great deal of testing and is thoroughly familiar with the car. Hulme, the reigning World Champion, is not so fortunate, and is driving for only the second time. The car is very fast indeed, and it handles well.
And so the scene is set, the stage laid, with practice times and today's race itself being a worthy pointer to the Grand Prix season.

The 8 watt output of Radiomobile 980 rises clear above traffic roar. Radiomobile car radio is without equal in sound quality and sound power The Radiomobile permeability tuner and built-in filters plus the unique fitting techniques which only your Radiomobile dealer provides, guarantee this. Radiomobile car radio talks big.

Apply a convenience test to
Radiomobile 980. With five push buttons and automatic wave change, choose
your own station at the flick of a finger. Choose any station-from 'pop' to classical. There's manual tuning too;

## Out of the Past...

## BILL BODDY

Editor of MOTOR SPORT
This race, in which the youngest car competing will be nine years old, is not intended to provide light relief. After the modern racing, these historic cars may seem slow, especially if they have to run on a wet track. They do not have the sort of suspension set-ups which glue today's racing cars to the track, nor do they have the benefit of enormous tyre sections for transferring their not inconsiderable power to the road.

But what this race does is to demonstrate how earlier generations of racing drivers appeared to their public, how they had to hold power-slides, cope with over-steer, and could be seen doing these things, because they sit upright in comparatively roomy cockpits, instead of lying on their backs in coffin-like projectiles. In other words, the sight, sound and smell of the older racing cars is very different from what went on earlier in the afternoon during this memorable day at Silverstone. They are well worth watching, apart altogether from the speeds they can accomplish.
The entry list contains three Lotus 16s, which were built for the later period of Formula One racing to the $2 \frac{1}{2}$-litre engine limit. These cars have Coventry-Climax power units, which were very remotely related to a war-time fire-pump unit and without which the racing-car manufacturers of a decade ago, B.R.M. and Ferrari apart, would have been without any means of powering their cars. Bill Wilks has the full $2 \frac{1}{2}$-litre engine, Le Sage and Boorer the interim 2-litre Climax engines in their somewhat earlier Lotuses. Against these light, compact cars, which were the last front-engined G.P. cars of Colin Chapman, are ranged four 250F Maseratis, famous as six cylinder

twin-cam space-frame Italian cars, also front-engined, which brought fame to drivers of the calibre of Moss and Fangio. Of these potent $2 \frac{1}{2}$-litre Maseratis, those of the Hon. Patrick Lindsay and Charles Lucas are the 1957 lightweight versions, Maserati taking the Manufacturers' Championship that year, the Marquis of Clydesdale and Colin Crabbe driving not quite such potent 1956 models.
Then there are a couple of Cooper-Bristols from an earlier era of motor racing, the late Charles Cooper having virtually evolved the modern form of rear-engined racing car when building a motorcycle-engined 500 c.c. car for his son John. But these particular Coopers have six-cylinder cross-pushrod inclined-valve Bristol engines at the front of the chassis and represent the 1952 Formula Two cars, of the type with which the late Mike Hawthorn first began to prove that he was a driver of World Championship proportions. Hampered by an engine which was more "sports" than "racing", these Coopers have all-independent suspension by transverse leaf springs and wishbones and poke out about 135 b.h.p., giving them a top speed in the region of $140 \mathrm{~m} . \mathrm{p}$.h., compared to some 170 m.p.h. of the Maseratis.

Alan Cottam's lone Connaught is a 1953 AL10 single-seater which recalls the gallant effort made by a small British concern based in Surrey to compete against the might of the Continental entries one-and-a-half decades ago. Today the green of Britain is supreme in International motor racing but this has come about-and I sometimes wonder whether we make quite enough of it-through the pioneering of makes like Alta, H.W.M., Connaught and Vanwall. The A-type Connaught is a Formula Two car with a 2 -litre four-cylinder engine based on the Lea-Francis production engine, suitably developed, and installed in a tubular chassis with torsion-bar i.f.s. and a de Dion back axle. Road holding is good but lack of power limits top speed to about $135 \mathrm{~m} . \mathrm{p} . \mathrm{h}$.

Going back further in time, pre-war racing is represented in today's entry list by that very famous Spa Special Aston Martin, which is a long-distance sports car which has innumerable club races to its credit and gained initial fame in the 24 -hour event in Belgium, one of the single overhead camshaft K3 M.G. Magnette racers from the days when the late Cecil Kimber infused enthusiasm and initiated a busy racing programme at Abingdon, and Lindsay's very splendid monoposto Alfa Romeo, brought back to this country from Australia, this being the ultimate in these advanced Tipo B Grand Prix cars from the celebrated Milan factory, having Dubonnet i.f.s., dual propeller shafts to a back axle sprung on reversed $\frac{1}{4}$-elliptic leaf springs, and the 2.9 -litre version of straight-eight supercharged twin-cam engine. Quite who will

Maserati 250F drive this Alfa Romeo I do not know at the time of writing but it would be easy to visualize Tazio Nuvolari in its classic cockpit!
To predict the winner in any motor race is a stupid thing to attempt. But I shall expect to see Lucas lead the field, closely pursued by Lindsay, Clydesdale and the Lotus drivers.

Amongst the pre-war representatives there is an excellent turn-out of E.R.A.s, those supercharged $1 \frac{1}{2}$-litre cars with engines based on that of the Riley with its inclined o.h. valves operated by twin high-set camshafts and short push-rods, an epicyclic gearbox, and harsh-sprung half-elliptically-suspended chassis. These "English Racing Automobiles" won many voiturette races for Britain and both the B-series cars and the more sophisticated C-model of Donald Day and Gahagan's 2 -litre version are entered today. Their supercharged engines sound and go extremely well but the very handsome Grand Prix Bugattis should keep up round the corners by reason of their impeccable road-clinging qualities. The H.W.-Alta, like the Connaughts, represents another praiseworthy attempt to put the green of Britain (well, they were green in those days!) ahead of the red of Italy in just-post-war racing, while Lockhart's Rover is something different again, a special single-seater evolved by some young engineers at the Rover Co. for their own use, its de Dion back-end having something in common with that of the successful present-day Rover 2000 and Three-Thousand-Five catalogue models. Finally, look carefully at that huge $10 \frac{1}{2}$-litre V12 Delage, built in 1923 for French hill climbs and which had an honourable Brooklands career in the hands of John Cobb, Oliver Bertram and brave little Mrs. Kay Petre (who got it round the banked track at 134.75 m. p.h.). For like Brooklands itself, it belongs to an era which will never return, one of the giants from the heroic days of motor racing.

## Fords take Easter Rally Honours

Escort Wins 1500 mile Circuit of Ireland Rally - outright!
Cortina Lotus 2nd overall in East Af́rican Safari Rally!

It's through rally successes such as these that the Ford Competitions Department is able to develop equipment which improves the performance and driving comfort of these cars. This equipment is tested under extreme competitive conditions. To pass on the know-how we have gained, the Ford Performance Centre have published 'The Ford Book of Plus Performance', which is filled with experienced advice and details of high performance equipment for the Ford range.
Now, for the first time, Ford developed equipment is available for the Escort range and includes: Magnesium wheels. Steel main bearing caps. Tuftrided crankshafts. Special reclining seats with headrests. High pressure oi pumps. Salisbury limited slip diff. Various crown wheel and pinion ratios. If you would like details of these and many others or a copy of 'The Ford Book of Plus Performance' (cost 8/6d including postage), fill in the coupon below and send to: Eric Bristow, Ford Performance Centre, Boreham, Essex.

## FLYING DISPLAY

This month is the 25 th Anniversary of the opening of Silverstone as a wartime airfield.
A Spitfire and the Skylark Aerobatic team will give the following demonstrations and have kindly been permitted to do so by the Participation Committee, Ministry of Defence, to whom we are most grateful. The Spitfire will give a fly past, and it comes from the Historic Flight Section 2,000 b.h.p. Its maximum speed is 446 m 2-stage cent. blower V12 R.R. Griffon Engine giving span 36 ft . 10 ins. This model was used for 'photo recce and Met flights, It will be flown by S . Wing J. G. Ince, who is 39 , married with two boys and comes from Blackpo in 1947 and has 3,500 flying hours, all on fighters.
The Skylark Aerobatic Team of 4 Chipmunk Aircraft will give a display of co-ordinated and formation aerobatics. They come from the Central Flying School, Little Rissington, the dant of which is Air Commodore Frank Dodd, D.S.O., D.F.C., A.F.C., and the main function of train instructors.
The Chipmunk is the basic trainer aircraft of the R.A.F. and all pilots complete 30 hours on this aircraft before going straight on to Jet Provosts. It first entered service in 1950 and was reintruduced as a basic trainer in 1966. It is powered by a Gipsy Major enginelof $145 \mathrm{~b} . \mathrm{h} . \mathrm{p}$. , has a maxi-
mum speed of $173 \mathrm{~m} . \mathrm{p} . \mathrm{h}$. and a stalling speed of $40 \mathrm{~m} . \mathrm{p} . \mathrm{h}$. and a duration of 2 h is under the command of S/Ldr. Brian A. Owens, M.B.E., who is 40 , married with 2 sons and comes from Herefordshire. He joined the service in 1945 and became a qualified Instructor in 1961 and has instructed the University Squadrons of Oxford and Wales. He has 4,300 flying hours to his F/L.
F/Lt. Gordon Webb is 42, married with two children, comes from Bath and has 4,300 flying hours mostly on Bombers. F/Lt. Peter J. Dunner is 29, married with no children. His father was an airgunner during the war and he comes from Edinburgh. He joined the service in 1960 from the Nelson is 30 , married Air Squadron and has 2,300 flying hours mainly on V Bombers. F/Lt. Barry on V Bombers.

The Spitfire will give a display from 1.35 p.m. -1.40 p.m. The Skylarks will
give a display from 1.40 p.m. -1.50 p.m. and will then land and it is proposed immediately to take the pilots on a one lap tour of the Circuit in an open vehicle.

## Are you a

motorist?
already enjoying peace of mind motoring; without the worry of rising oil consumption or falling oil pressure; with the confidence of full bodied engine protection even at sustained motorway speeds; with freedom from harm ful sludge, a hazard of cold running-short journey condi tions; with protection from corrosive wear even when parked for prolonged periods in the open?
If not-change to

the oil with the perfect body

## Piston versus Turbine

## by GREGOR GRANT

Will the present 3 -litre formula spell the end of the dominance of piston engines in grand prix racing? That is the question that technicians are asking, as the conventional power-unit gradually moves towards what many maintain will be the ultimate development for normally-aspirated engines. Frank Whittle's jet engine, crude in the beginning, quickly made such superb units as the Rolls-Royce Merlin practically obsolete within a few months. Some say that modern small gas-turbines will do the same in the automobile world, with motor-racing as an incentive. Again, the rotary engine has its advocates, and the technology of multi-unit construction has already produced considerable advance in this field.
However, the onslaught on the reign of King Piston has scarcely begun. True, the S.T.P. machine started a trend in 1967, with victory almost within its grasp at Indianapolis. Rover-B.R.M. had great possibilities at Le Mans, and now attention is focused on the interesting American Howmet T.X. By 1969, it is said, at least one gas-turbine machine will be seen in grands prix; should "Indy" fall to such a powerunit, then it is possible that there will be more.
Yet this is all, more or less, conjecture. During 1968 the battle will be confined to piston engines, and to two schools of thought. On the one hand there is the V-8 brigade, as exemplified by Ford-Cosworth and Repco-Brabham. The former is used by Gold Leaf Team Lotus, McLaren, Matra International (Tyrell), and Walker-Durlacher (Lotus). The V-12 advocates comprise Ferrari, Honda, Eagle, Matra (France) and B.R.M., the last-named also being fitted by Cooper and Parnell. B.R.M. also have the controversial H-16. Two other V-8s may appear later, one being the Abarth and the other, Alfa Romeo in another chassis.
As regards chassis design, the majority favour monocoque or semi-monocoque construction, the exceptions being Eagle and Brabham with space-frames. In general, suspension systems are closely related, the influence of Colin Chapman of Lotus, and Eric Broadley of Lola having spread to the other contenders, including Ferrari.
Briefly, the aim of a modern formula one designer is to build as compact a car as possible, make it as near the minimum weight as is feasible, and install the most powerful engine available. Yet power is not the be-all and end-all, for as has

## MOTOR RACING IN SAFETY-

## THE HUMAN FACTORS—by Dr Michael Henderson, BA., MB., BChir

This is a book for every racing driver who values his life; for all keen motor racing enthusiasts who want to increase their appreciation of just what are the dangers and stresses to which a racing driver subjects himself, and how he can overcome many of them; and for car designers, automobile engineers, and all concerned with safety on circuits, whose duty it is to acquaint themselves fully with the results of up-to-date research into the whole question of driver, car and circuit safety. In his foreword, Louis T. Stanley, Director-General of the International Grand Prix Medical Service, says:'It is bound to be a standard work on the subject... Motor 36s. net Racing in Safety has all the ingredients of a specialised best-seller'. ( p \& p 1s 6d)

## PLEASE NOTE

PARKING. Should your car be in the front row, nearest the Circuit, please leave it where the Arrendant has indicated, unti the meeting is over.
TRACK. All races are run in a clockwise direction.
POST OFFICE. All postal enquiries for correspondence, parcels, etc., should be made at the mobile post office, which is situated on the public side of the Motor bridge between the pits and the pits grandstand.
INFORMATION. Results, commentaries and other information will be announced on a public address system installed around the circuit.
VIEWING. The promoters reserve the right to remove any small stands that may be erected by spectators and which interfere with the viewing and personal comfort of other racegoers.
CONSIDERATION. Please avoid damage to valuable crops and land in and around the Circuit

INVALID CARRIAGES. There is a specia enclosure for spectators in invalid carriages You are specially requested not to stand in front of these vehicles obstructing the view of the occupants. Remember they canno see any of the racing unless their view is unobstructed.

ANIMALS. Dogs and other animals are not, in any circumstances, admitted to the Circuit.

SAFETY. The banking erected round this Circuit is there for your protection. It is forbidden to stand, sit or climb on it.

DEPARTURE. Police and Car Park Attendants are here to facilitate your exit from the Circuit quickly and safely after the Meeting. Please do your part and drive slowly and carefully when leaving

LOST PROPERTY. Articles found at Silverstone should be handed to the nearest policeman or B.R.D.C. official.

# IF Stirling Moss, David Phipps, Henry Manney III, L. J. K. Setright and Michael Twite are more than just names to you . . . read on! 

CAR magazine, whose editor, Doug Blain, has been described by America's Car and Driver as 'very in, because he's made something fresh and lively grow in the petrified forest of British automotive journalism', is launching a unique 16 -page pull-out supplement as a regular free extra.
The first issue will include reports on the BOAC 500, the East African Safari and the Thruxton Easter Meeting, plus articles by all those big names. Mike Twite (formerly MLT, Editor of Motoring News) is in charge of the supplement.
Not only the sport, but also the gentler world of veteran and vintage cars will be extensively catered for by the supplement, under the guiding hand of David Burgess Wise, former Editor of Old Motor.

## Co capavamming minh Cul.

Our track demonstration today shows how easy it is to tow a C.I. caravan behind any car - but to find out more about all the fun of caravan touring with your family, send the coupon for a guide in full colour and details of Eccles, Europe, Fairholme and Sprite caravans.
The demonstration is on the track after the Caravans International Trophy Race.
CARAVAFS INTERNATIONAL
the world's largest and most experienced caravan manufacturers

## To: Caravans International Ltd.,

## Who'll support your supporters?

## Mills!

With a Millstand. It's more than a grandstand. It's a great stand. Proof? The price. Just a fraction of the cost you'd expect to pay for an ordinary grandstand - whether you buy or hire. And there's nothing ordinary about this one. It can be put up, taken down - fast. That saves you time. And money. A lot of money! The next time you have a hand in organising a spectator event (of any kind) you'll be sitting pretty.
P.S. Want to control your supporters?

Ask about Mills Crowd Control Barriers.
Write or phone for details today.

## Millstand System Seating

Mills Scaffold Co. Ltd., Winchester House 53/55 Uxbridge Road, London, W.5. Tel: 01-567 3083.

## THE SILVERSTONE CLUB

## founded to support the home of British motor racing.

The Silverstone Club was formed early in 1966 by a group of enthusiastic followers of the sport, and in particular loyal supporters of Silverstone Circuit, anxious to help 'their' circuit in any possible way. The idea was that any surplus monies earned by the new Club would automatically be used on behalf of the circuit-in the early stages for the members of the new Club, but finally for the good of the public at large. In return for this very sympathetic attitude, the British Racing Drivers' Club has found it possible to offer unusual benefits to the members of the Silverstone Club.

The already growing membership enjoys the following benefits:-

## FOR AN ANNUAL MEMBER

1. Six members' free Test Days per annum.
2. Three Woodcote Corner Stands reserved free of charge to Club Members at all Club Meetings.
3. One Woodcote Corner Stand reserved to Club Members at specially reduced prices-5/-off-at major meetings.
4. Exclusive use of Clubhouse in Woodcote Enclosure at all Meetings.

## FOR A LIFE MEMBER

All those listed above, plus free admission to the Stewards' Enclosure, Stewards' Toilets, and the B.R.D.C. Members' Club Bar. Plus car admission to the inside of circuit.

| Annual Membership including one guest | $£ 3$ | 3 | 0 |
| :--- | ---: | ---: | :--- |
| Annual Membership including two guests | $£ 5$ | 5 | 0 |
| Junior Membership (10-17) | $£ 1$ | 1 | 0 |
| Life Membership including one guest | $£ 52$ | 10 | 0 |
| Life Membership including two guests | $£ 78$ | 15 | 0 |

Regular followers of the sport at the home of British motor racing should take advantage of this unique opportunity to support their circuit. If one works out the benefits obtained it is, in fact, economically wise to join. A Life Member, for example, will, in as little as four years, gain benefits worth the whole of his life subscription.

A distinctive badge is available to members. It is the actual shape of the circuit and embodies an inset miniature version of the B.R.D.C. badge.

Facing this page will be found an application form for those wishing to join. On it will also be found the Hon. Secretary's name and address; he will be happy to provide further details and answer any queries.

## 1968 Silverstone Meetings

Not all spectators are aware that during the season there are no less than forty-four meetings at Silverstone. To assist enthusiasts to enjoy many happy days' motor racing, the 1968 Silverstone Calendar is shown below.

## The most

compact.

The compact is an Ameri-
can idea.
A small car
with big car
virtues. Like
the Sunbeam
Stiletto. Thus.
The engine is the Imp Sport 875cc single OHC
inclined four-cylinder.
$0-50$ in 10.6 secs. ('Motor' road test.) Top speed 90 mph
Plus big car features. Wind-up windows. Carpet, wall-to-wall.
Amblair-upholstered seats.
Outside: great trim. Black vinyl covered roof. Four headlights

Recommended price
seat belts extra.

And small car advantages Parking. Garage space.Economy No other small car combines luxury and performance like this. For only £813*

Come and take a test drive.
Rootes new deal is your new deal.

## The Sunbeam Stiletto sunbeam rootes

It's a square world for new car owners and buyers. The sweeping curves and rounded bonnets of the early sixties are out. Swinging squares and dominant rectangles are in.

Lucas greet the trend-and the Springwith a brilliant new pair of auxiliary lamps, the SQUARE 8's.

If there's a new car in your future (or in your recent past, for that matter) you must see these stylish newcomers. They look great. But they don't just look great. They're powerful, too with quartz-halogen light power and Lucas beam control.

Ask for the SQUARE PAIR-by Lucas. O.K., they're not really square. But then, neither are you, or Lucas. Suitable for upright or pendant mounting.

## Recommended price

## SQUARE 8 FOG AND

## LONG RANGE LAMPS $£ 5$. 19. 6 each

including cover, switch and cable.

## LUCAS SロUคRE <br> 

QUARTZ-HALOGEN FOG AND<br>LONG RANGE LAMPS

With each SQUARE 8 , there's a free protective cover in simulated black leather finish. It's tough enough to shrug off flying stones, it keeps the lens clean for instant use and it shows you're as smart as it looks.
